EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Pieprz and Van Ernest on 11/09/06.

The application has been amended as follows:

2. Claims 41 and 44-49 have been cancelled.

3. Claim 25 has been amended as follows:

- In line 7 of claim 25, the phrase "a signaling protocol message" has been replaced with the phrase --an ATM SETUP signaling protocol message--

- In line 18 of claim 25, the phrase "one field" has been replaced with the phrase --one field of the ATM SETUP signaling protocol message--

4. Claim 36 has been amended as follows:

- In line 5 of claim 36, the phrase "a signaling protocol message" has been replaced with the phrase --an ATM SETUP signaling protocol message--

- In line 16 of claim 36, the phrase "the signaling protocol message" has been replaced with the phrase --the ATM SETUP signaling protocol message--

5. Claim 42 has been amended as follows:

- In line 1 of claim 42, the phrase "claims 41" has been replaced with --claim 38--

Art Unit: 2616

6. Claim 43 has been amended as follows:

- In line 1 of claim 43, the phrase "claims 41" has been replaced with --claim 38--

7. The following is an examiner's statement of reasons for allowance:

Independent Claims 25 and 36 and dependent claims 26, 28, 34, 35, 37-40, 42, and 43 are allowable over the prior art of record since the cited references taken individually or in combination, fail to particularly teach or suggest a method of originating a switched virtual circuit (SVC) connection for a subscriber in an Asynchronous Transfer Mode (ATM) network from an ATM access port different from a previously registered access port associated with the subscriber using an ATM SETUP signaling protocol message comprising a plurality of fields wherein a first field having been modified to contain a customer field and a second field having been modified to contain an access port identifier corresponding to the ATM access port. It is noted that the closest prior art, Perinpanathan et al (US 6, 636 522 B1), discloses the use of ISDN Q.931 SETUP message and the IP based H.323 SETUP message in terminal mobility. It is also noted that another closest prior art is Acharya et al (Arup Acharya, Jun Li, and D. Raychaudhuri, "Mobile ATM: Architecture, Protocols and Implementation", IEEE, 1997) and Acharya discloses the need to modify the ATM SETUP message (i.e. Q.2931), in order to support ATM mobility, with new fields or Information Elements for the permanent or previously registered port address but fails to suggest the need for a new field in the ATM SETUP message for the "care of" or remote port address.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
